Ans. No.

Q.3. Can successful bidder take the coal to any other plant owned by the same bidder?

Ans. Prevalent Govt. rules shall apply.

Q.4. How to determine final adjustment based on analysed GCV/moisture mentioned in Clause B.8.c?

Ans. **Calculation for GCV adjustment:**

Where the third party sampling and analysis is undertaken and the same leads to variations in grade via-a-vis declared grade, the adjustment/payment by way of debit/credit note shall be done in the following manner: -

- i. The initial invoice shall be raised based on declared grade and Total Coal Value. This invoice shall be subjected to adjustment pursuant to third party sampling analysis.
- ii. In case the Analysed weighted average Equilibrated GCV of Coal dispatched during any calendar month is G-14 (3101-3400 Kcal/kg), then there is no Credit/Debit note on either party. In case the Analysed weighted average Equilibrated GCV of Coal dispatched during any calendar month is lesser/greater than G-14 grade, then the day wise GCV of coal will be considered for calculating the Debit/Credit amount for the month. It is to further clarify that the said calculation will be carried out only for the balance days where the GCV of coal is not within G-14 grade.
- iii. In case the Monthly weighted average GCV of coal is less than the declared grade, i.e less than the bottom range of the GCV band (i.e.<3101Kcal/kg), then the price adjustment for issue of credit note to Buyer shall be worked out as under:

GCV Adjustment, Rs./day = Quantity of coal dispatch on the day x (Bid Price*) X [(3250 – Analysed GCV of coal for the said consignment in Kcal/kg)/ (3250)]

*Bid Price is the sum of discounted NCI Price of relevant month and Bid premium

The Credit arising on account of GCV Adjustment in each day will be reconciled on monthly basis and shall be dealt through Credit Adjustment Note separately for each month.

In case of issue of credit note, adjustment/refund of differential price along with Goods & Services Tax (GST) shall be made as applicable. Any credit in respect of other statutory duties, taxes and levies, be adjusted/refunded if and when received by the Seller.

- iv. In case the Monthly weighted average GCV of coal is higher than the declared grade of coal, i.e more than the highest range of the GCV band(>3400Kcal/kg), then the price adjustment for issue of debit note to Buyer shall be worked out as under:

GCV Adjustment, Rs./day = Quantity of coal dispatch on the day x (Bid Price*) X [(Analysed GCV of coal

for the said consignment-3250)/(3250)]

*Bid Price is the sum of discounted NCI Price of relevant month and Bid premium

The debit arising on account of GCV Adjustment in each day will be reconciled on monthly basis and shall be dealt through debit Adjustment Note separately for each Month.

In case of issue of Debit note, the differential price with all applicable statutory duties, taxes and levies shall be payable.
